Puppy Teething Woes
 Got a new pup with teeth coming in? Make sure you provide plenty of chew toys and put ice chips in the water bowl. Freeze aloe vera juice into cubes or in a paper cup, then rub the frozen juice on your pup’s gums. Try steeping one teaspoon of dried Chamomile in 8 ounces of water and let it cool. Freezing a wet cloth and letting the pup chew on it helps too. Don’t give the puppy old shoes to chew on: they can’t tell old from new!

Why dogs don’t live longer.....People are born so that they can learn how to live a good life – like loving everybody all the time and being nice. Dogs already know how to do that, so they don’t have to stay as long.
